eDOC Mobile RDC Surpasses 2 Million Checks Processed Annually

MIDDLEBURY, VT– July 2021

eDOC Innovations, a leading e-commerce Credit Union Service Organization (CUSO) based in Vermont, has continued to grow its mobile remote deposit capture (Mobile RDC) enrollments and surpassed 2 Million checks processed in 12 months. Since April 2021, 15 additional credit unions have started using the service for a total of 35 new users in 2021. There are 229 credit unions on the platform and nearly 300K active members.

“The past 18 months have shown that conducting remote transactions can be done securely, accurately, and enhance the member experience,” comments Mark Fierro, CEO of eDOC. “Even as credit unions across the country reopen for in-person service, we have not seen a decline in mobile deposit volume; we have seen the opposite. Once members and credit unions started to use the technology, they embraced it and will not return to their old habits. eDOC believes that every credit union should have this technology available to serve their current and future members. Mobile Remote Deposit is a must-have for even the smallest of credit unions.”

CheckLogic Mobile was designed and created in collaboration with one of eDOC Innovations CUSO Owner, CU*Answers, and has provided Mobile RDC to four CUSOs nationwide. It has the flexibility to enable credit unions to define global and member-specific limits, as well as restrictive endorsement detection.

About eDOC Innovations, Inc.

eDOC Innovations is the nationwide leader in mobile enterprise digital transaction management and e-commerce software for credit unions. For almost 30 years, eDOC Innovations has been designing solutions to reduce overhead, increase operational efficiency, and provide convenience to members. eDOC Innovations’ products include solutions for remote mobile and in-branch closings, mobile e-signature processing, digital asset lifecycle management, intelligent and interactive form automation, mobile remote deposit capture, electronic statements, and more.
