**eDOCSignature® Momentum Continues**

MIDDLEBURY, VT – April 5, 2021

eDOC Innovations, a leading e-commerce Credit Union Service Organization (CUSO) based in Vermont, continued its growth by signing 44 new credit union clients to eDOCSignature®, the company's e-sign solution. These 44 new clients were all added during the first half of fiscal year 2021.

Introduced in 2016 to a handful of credit union early adopters, momentum for eDOCSignature continues to build and reflects a steady growth in the credit union space. This growth is due in part to the addition of other core processing systems as integration partners. Designed for credit unions, eDOCSignature provides state-of-the-art automation that empowers credit unions and drives value back to their members by meeting their mobile banking needs. The solution can be deployed as a standalone or integrated with one of eDOC's several core processing partners.

"eDOCSignature is a 'must-have' solution for completing transactions that would otherwise require a member's physical presence or the expensive, and often inefficient, alternative of overnight mail. With the changing consumer/member pattern in transaction management, the benefits of eSign cannot be overlooked," commented Joseph Lao, VP of Sales and Market Development at eDOC.

About eDOC Innovations, Inc.

eDOC Innovations is the nationwide leader in mobile enterprise digital transaction management and e-commerce software for credit unions. For more than 25 years, eDOC Innovations has been designing solutions to reduce overhead, increase operational efficiency and provide convenience to members. eDOC Innovations' products include solutions for remote mobile and in-branch closings, mobile e-signature processing, digital asset lifecycle management, intelligent and interactive form automation, mobile remote deposit capture, electronic statements, and more.
