eDOC and CompuSource Launch Integrated eSign Solution

MIDDLEBURY, VT – February 10, 2021

CompuSource Systems, Inc., a credit union core data processing company based in western New York, and eDOC Innovations, a Credit Union Service Organization specializing in mobile enterprise digital transaction management, announced the completion and rollout of an eSignature integration for CompuSource clients.

“To meet the evolving technology goals of our clients, and in keeping with providing the highest value in core processing, we have introduced an eSignature integration that is available to every credit union currently using our software,” said George Stoll, Software Development Manager at CompuSource. “As we endeavor to be a single-source solution provider to each of our clients, we offer this integration to all of our credit unions at no cost!”

“We appreciate CompuSource for their commitment to provide integrated solutions to all their clients. In building this integration together, we joined our respective organization’s resources to provide a frictionless workflow that facilitates the speedy completion of day-to-day transactions for both credit union staff and members,” said Mark Fierro, CEO of eDOC Innovations. We share the same vision and welcome them as an integral partner in our effort to empower credit unions through deeply integrated digital workflows.”

About CompuSource Systems, Inc.

CompuSource Systems, Inc. employs a service team that supports, evaluates, plans and implements the best core processing system for credit unions. The CompuShare Credit Union Core Processing System is a powerful in-house solution designed for credit unions serving all memberships to 20,000+. CompuShare is ideal for credit unions seeking a permanent solution and the highest value in core processing. Specifically designed for growth-oriented credit unions, CompuShare automates more than just the basics with an intuitive, user-friendly interface.
