eDOC and Origence Collaborate to Launch Integrated eSign Solution for Lenders

MIDDLEBURY, VT – April 16, 2021

eDOC Innovations, a Credit Union Service Organization specializing in mobile enterprise digital transaction management and Origence, an industry leader providing next generation lending technology for financial institutions, have announced the completion and roll-out of an e-signature integration with the Origence Consumer Loan Origination System (LOS).

Integration of the Origence Consumer LOS with eDOC's eSign solution will allow lenders to generate dynamic loan documents and enable those documents for eDelivery, eSignature, and eClosing capabilities, thereby improving the borrower experience and optimizing the lending process.

The Origence Consumer LOS is a comprehensive loan origination system designed to improve the lending process and overall experience for both consumers and lenders across a variety of loan products.

Currently, there are almost 600 credit unions that utilize eDOC's eSign platform with many more signing up for the solution.

"We are committed to delivering products and solutions that meet the demands and needs of our credit union clients by bringing innovation and expertise to indirect lending, consumer and mortgage loan origination, point-of-sale, online car buying, and many other applications," said Brit Barker, vice president of enterprise solutions for Origence. "With the knowledge and experience our staff brings from all verticals, we are able to consistently deliver leading-edge solutions, including integrations with providers such as eDOC."

"eDOC's e-signature and image management capabilities paired with Origence's top-notch lending platform offer a competitive solution for our mutual clients," said Mark Fierro, CEO of eDOC Innovations. "Their vast lending expertise coupled with eDOC's commitment to attend to the needs of the underserved makes for a great value proposition that is unmatched in the credit union space; and I am pleased to be collaborating with a great organization that is committed to be the very best in what they do."
