INTERFACE.AI TO HOST WEBINAR ON "BANKING IN THE AGE OF AI" - EXPLORING THE LATEST ADVANCEMENTS IN ARTIFICIAL INTELLIGENCE

SAN FRANCISCO, CA - June 23, 2023 - interface.ai, a leading innovator in artificial intelligence solutions for the banking sector, is set to host a groundbreaking webinar titled "[Banking in the Age of AI](#)". The webinar is scheduled for Tuesday, 27th of June, at 11 am Pacific Time and aims to explore the latest advancements in AI, their implications for financial institutions, and how interface.ai is utilizing these advancements to shape the future of banking.

interface.ai invites leaders, decision-makers, and innovators from banks and credit unions across the United States to join this enlightening session. Attendees will gain valuable insights into recent AI breakthroughs, such as generative AI and multi-modality, and understand how these technologies can accelerate banking operations and enhance customer experiences.

The webinar agenda is packed with engaging content, starting with an introduction to the advancements in AI technologies, followed by a discussion on the vision and roadmap for interface.ai in the banking industry. Attendees will also get a comprehensive overview of interface.ai's suite of AI-powered products and services and how these are poised to revolutionize the banking industry.

Additionally, interface.ai will introduce new groundbreaking products designed to further streamline and simplify banking processes.

A key highlight of the webinar will be a live customer demo featuring University Credit Union(UCU)'s new offering built on interface.ai's revolutionary AI technology. As part of this, UCU's EVP, Chief Operating and Lending Officer [Estela Nagahashi](#), will also be speaking about the practical applications and advantages for financial institutions with these latest AI advancements.

"We're excited to host this webinar, highlighting the fascinating potential that recent strides in AI hold for the banking landscape," stated Srinivas Njay, CEO of interface.ai. "Our core objective is to provide every financial institution on the planet with the necessary tools to scale efficiently and assist banking customers in achieving financial wellness. Given the recent breakthroughs in AI, it's evident that we're not only speeding toward our mission, but these advancements have prompted us to think bigger and foster unprecedented impact. This is our chance to enable community banks and credit unions to not only keep pace but leap ahead through the transformative power of technology."

The session will conclude with a Q&A, giving participants a chance to interact with the presenters and have their pressing questions answered.
