FORTERA FOUNDATION

Desiring to direct our resources for the greatest life-changing impact, the Fortera Foundation was established in 2019 to increase the quality of life for single parents and their children while breaking the cycle of generational poverty.

Within our communities, local demographics contribute to an especially high rate of poverty among single mothers, making it difficult for this growing segment to fulfill educational and occupational aspirations.

While earning a post-secondary degree is a well-established pathway out of poverty, single

parents face enormous logistical challenges made all the more difficult by low wages and limited access to childcare, affordable housing and transportation.

With a specific focus on improving long-term outcomes for these families, the Foundation seeks to lower single parent college dropout rates, increase educational opportunity and academic success for parents and children, and increase economic self-sufficiency.
