## **eDOC Innovations Announces Product Enhancements**

### **Middlebury, VT- February 25, 2026**

eDOC Innovations is proud to announce its February 24, 2026, product release, delivering enhancements across eDOCSignature, iDOCVault 2.0, Legacy idocVAULT, and CheckLogic. The release introduces expanded integration capabilities, strengthened audit visibility, and performance improvements designed to support financial institutions in managing secure, efficient digital operations.

The update includes new integration capabilities within eDOCSignature, enabling embedded live support functionality during the signing experience. Enterprise-tier clients may also leverage newly supported in-person signing devices for secure, handwritten digital signatures.

Additional improvements enhance workflow efficiency and compliance transparency, including configurable signing steps, clearer audit documentation, improved password validation messaging, and expanded support for special characters in user credentials. The release also introduces interface consistency updates and improved rendering of pre-populated fields during document preview.

Enhancements to iDOCVault 2.0 focus on performance optimization and administrative controls, including improved document search functionality, configurable data export settings, saved search enhancements, and administrative tools to reset member multi-factor authentication methods.

CheckLogic updates strengthen operational reliability with editable MICR fields, enhanced settlement reporting, improved batch processing resiliency, and streamlined system handoffs.

“This release represents our continued focus on delivering practical innovation that strengthens both operational efficiency and compliance confidence for our clients,” said Mark Fierro, CEO of eDOC Innovations. “By enhancing integrations, improving audit transparency, and optimizing performance across our platforms, we are equipping financial institutions with the tools they need to deliver secure, seamless digital experiences.”
