eDOC Innovations and Advanced Fraud Solutions Partner to Bring Deposit Fraud Intelligence to Credit Union Check Imaging

Middlebury, VT– March 17, 2026

eDOC Innovations, a provider of check processing and document management solutions built for credit unions, announced a new partnership with Advanced Fraud Solutions (AFS), a leader in deposit and payments fraud prevention. The integration connects AFS's consortium-based deposit fraud detection with eDOC's check imaging platform, giving credit unions the ability to screen deposits against real-time fraud intelligence as items move through capture, processing, and settlement workflows.

eDOC serves credit unions nationwide with a complete suite of check processing solutions. By embedding AFS's deposit fraud intelligence directly into that workflow, credit unions can identify suspicious items earlier in the process, reduce manual review, and flag counterfeits, duplicates, and altered items before losses occur. AFS's solutions are already trusted by more than 1,200 financial institutions to detect and prevent fraud across check, ACH, and wire transactions in real time.

The partnership launches with batch-level integration and plans to expand into real-time and teller check deposit channels later this year, extending fraud coverage across every deposit touchpoint.

"Credit unions are seeing more check fraud across more channels, and their teams are stretched thin," said Jordan Bothwell, Chief Partnership Officer at Advanced Fraud Solutions. "By integrating AFS's consortium intelligence into eDOC's check imaging platform, we're helping credit unions catch fraud earlier in the process and giving their teams back the time they'd otherwise spend on manual review."

"Having a proven partner like AFS and their check fraud mitigation services provides added peace of mind for eDOC check processing clients. With advanced fraud detection mechanisms applied to each check transaction, financial institutions benefit from an additional layer of protection that helps identify suspicious activity and reduce fraud risk," said Mark Fierro, CEO at eDOC Innovations.

Credit unions interested in learning more about the eDOC–AFS integration can contact either AFS or eDOC Innovations or visit their respective websites.

About Advanced Fraud Solutions

Founded in 2007, Advanced Fraud Solutions provides deposit fraud detection software to over 1,200 financial institutions. AFS's solutions—including Positive Pay by

AFS, TrueChecks, TrueACH, TrueWire, and TrueAccount—detect and prevent fraud across check, ACH, and wire transactions in real time.

About eDOC Innovations, Inc.
