eDOC Innovations Partners with Corelation to Deliver Seamless, Core-Connected eSignature Solutions for Credit Unions

Middlebury, VT– April 27, 2026

eDOC Innovations, a provider of digital transaction management and document automation solutions built for credit unions, announced a new partnership with Corelation, a leading provider of core processing solutions. The integration connects Corelation’s Keystone core with eDOCSignature®, enabling credit unions to streamline document workflows and seamlessly manage signed documents within their core-driven environment.

eDOC serves credit unions nationwide with a comprehensive suite of digital transaction and document management solutions. By embedding eDOCSignature directly into the Corelation Keystone core, credit unions can automate document workflows, reduce manual processes, and ensure completed documents are securely stored and easily accessible. The integration supports a more efficient, connected experience for both staff and members, while maintaining strong security and compliance standards.

The partnership launches with direct integration between eDOCSignature and the Keystone core, with continued enhancements planned to further streamline workflows and expand automation capabilities across the document lifecycle.

“Partnering with Corelation allows us to bring eSignature capabilities directly into the core environment, eliminating friction and improving efficiency for credit unions,” said Mark Fierro, CEO at eDOC Innovations. “This integration helps institutions accelerate transactions while ensuring documents are securely managed from start to finish.”

Credit unions interested in learning more about the eDOC–Corelation integration can contact Corelation or eDOC Innovations or visit their respective websites.

About Corelation

Corelation is the creator of the Keystone core processing system, a modern, flexible platform designed specifically for credit unions. Since 2009, Corelation has been driving innovation in core processing with a person-centric design, open architecture, and real-time capabilities that help credit unions improve efficiency and enhance member service.

Built by industry experts with decades of experience, Keystone is designed to meet the complex needs of credit unions today while positioning them for future growth. Corelation is known for its strong commitment to client success, fostering strategic partnerships with credit unions and delivering high levels of service, transparency, and performance.
