Journey with the IAT

Allen Young, VP, education, PaymentsFirst
September 3, 2025 at 2:00 p.m. ET

International ACH (IAT) transactions offer a cost-effective and efficient way to handle cross-border payments. With typically lower fees compared to wire transfers, ACH transactions can be processed quickly, often within a few business days. They streamline recurring payments like payroll and vendor invoices, reducing administrative burdens while providing built-in security measures to protect sensitive financial information. Additionally, ACH offers clear transaction records for easy tracking and integration into existing financial systems. By facilitating payments with businesses and partners worldwide, international ACH opens up access to global markets and enhances financial operations for organizations.

Join us for the webinar as we journey through all things IAT, including:

- Strategies
- Operations challenges
- Compliance requirements

This 90-minute webinar is designed for ACH staff, payments professionals, operations staff or anyone who wishes to learn more about International ACH transactions.
